

	*Job Name: _____	
	*PO #: _____	
	*Dealer: _____	*Designer: _____
	*Date: _____	

Color Sample Specifications: * Required Fields

Type of Doors on Job	Solid	Veneer
* Wood Species: _____		
* Finish: _____		
* Top Coat: _____		Notes: _____

*** Color Samples**

\$10[†] - Additional/Updated "standard" color block - only colors from Simplicity, Harmony, Express, Spectrum, Weathered, or Closet color lines.

\$35 - Reformulated color block of an older Davis Mill and Cabinet color.[‡] (e.g. - CS10229-FS or 434-F)

*** Color Matching Services**

\$100 - Solid paint (no glaze) recipe transfer - Sherwin Williams or Benjamin Moore only. Direct recipe translation only, no extra effort to match directly. Potential for 50% credit of color sample cost towards jobs with 15 frt units or more.[§]

\$250 - Approximate Custom color match. Stain Only OR Glaze Only OR Stain and Glaze OR Paint Only OR Paint and Glaze color match. DMC may supply you with one color block that was matched or a range of colors to choose from.^{††}

\$1000 - Exact color match.^{‡‡} Stain Only OR Glaze Only OR Stain and Glaze OR Paint Only OR Paint and Glaze color match.

\$1250 - Custom matches w/ unusual techniques - Untested, unusual, or experimental finishes. No finish warranty on these finishes.

\$1500 - Exact side-by-side match to existing cabinetry. NO guarantees or finish warranty on these finishes.^{§§}

*** Scope of Job (# of cabinets, freight units, room description, etc):** _____

Notes: _____

*** Distressing:^{†††}**

None: _____

Standard:

Nicks and Dents: Level 1
 Worm Holes: Level 1
 Cracks - Frequency: Level 1
 Cracks - Severity: Level 1
 Rub Through - Edges: Level 1
 Rub Through - Flats: Level 1

Custom:	None	1	2	3	Notes:
Nicks and Dents:					_____
Worm Holes:					_____
Cracks - Frequency:					_____
Cracks - Severity:					_____
Rub Through - Edges:					_____
Rub Through Flats:					_____
Biffing on edges:					_____
Wearing on corners:					_____
Hewing:					_____
Other:					_____

[†] Prices DO NOT include freight. UPS freight for color samples is typically \$5-\$15. Additional Overnight charges may apply.

[‡] This is a reformulation only. The recipe will be transferred to into the current finish product being used. Some products (pigments and bases) are no longer available so conversion will not be possible. On finishes that can be translated, no efforts will be made by the factory to match aging. The recipe will be reformulated and applied to the sample block. Aging differences can be significant. If new color must match old color exactly, Custom Color Match must be ordered.

[§] Solid paint matches are done using computer software to tell how much of which pigments to add to the base. Sometimes the final product on wood does not exactly match the color on the paint chip or a latex paint equivalent. No effort will be made by the factory to tweak the recipe unless a Custom Color Match is ordered.

^{††} DMC may send a single color if we feel that the match is close enough, or we may send a range of 3-6 options to choose from. Designers are allowed one "tweak" after the original match or color range for no extra charge. Anything beyond that will push the color into the Exact Color Match category. Finishes in this category will typically add 2 points to the finish factor for bidding purposes.

^{‡‡} Exact color matching to other manufacturers colors can be problematic. DMC will make all reasonable efforts to match the reference color as closely as possible with our existing techniques and finish products. Finishes in this category will typically add 4+ points to the finish factor for bidding purposes. If the color match is used on more than 15 freight units for the job it was designed for, dealer is eligible a credit of 50% of the total price of the color match.

^{§§} Exact color matching to existing, aged cabinetry is very difficult (sometimes impossible) and can be very unpredictable. Colors can be matched in their current state, but the new color will age differently than the original color. Noticeable aging can happen very quickly - even as short as a few days. It is impossible to predict how a particular color will age and appropriately adjust a custom color match so that it will eventually age to match existing cabinetry. NO guarantees are made on these types of finish matches. DMC will make a door sample to match the reference sample, but for job production we will match the approved door sample only - no job site reference is needed. Any dissatisfaction and all costs associated with color on the final product will be designer/dealer responsibility including a) if new cabinetry doesn't exactly match existing cabinetry but is a reasonable match to the door sample or b) if new cabinetry matches at first but ages differently and does not end up matching.

^{†††} Distressing cannot be specified on "standard color blocks."
