

# Aluminum Door Waiver

Some or all of the following may apply to your project:

1. Hinge and handle/pull specs are critical. Aluminum doors can be difficult to drill holes in, at the job site. Doors are ordered as pre-bored for hinges and decorative hardware. The exact location of each pull, the spacing between holes, and the size of the holes must be submitted to Davis Mill and Cabinet, LLC (DMC) as a drawing. If no handle pull locations are given, DMC will assume that the client has made other arrangements regarding drilling for decorative hardware.
2. Aluminum doors take 3-5 weeks to manufacture after the order is placed. Please allow enough time in your job schedule for the doors to be ordered, built, shipped, and placed on the cabinets at the DMC factory before the job ships. If the job must be shipped before aluminum doors are received by DMC, the cabinets will be shipped on the main delivery and the doors will be shipped at a later date.
3. If the aluminum doors are not available to DMC prior to shipping the main delivery, DMC will not be held liable for any costs associated with, but not limited to, return trips by others to mount or adjust, etc., said doors. Any such costs are not the responsibility of DMC.

I have read the above explanation and find it acceptable. I agree not to hold Davis Mill and Cabinet, LLC or the Designer/Dealer responsible for any claims or problems resulting from these issues should they arise.
